VORTEX RAMMER COLD AIR SYSTEM

Replace your stock Air Box with a Vortex Rammer System and gain up to 22 horsepower. The system takes pressurized air from the radiator cavity, sends it through the radiator shroud into the specially designed scoop and forces it into the sealed box

of the Rammer. On C6's, it is then routed into a revolutionary air cleaner that contains an internal velocity stack. Installation requires just a simple cut-out on the radiator shroud. Available with black, clear or carbon fiber scoop. Hardware and instructions included.
